- 0x6A 0x00 Clear Long TOC
- 0x6B 0x00 Read Disc Status

Key features

- DSA Evaluation Board with USB interface
- Suitable for all DAISy DSA modules (GF6, GF8, CD-Pro2LF, etc...)
- Friendly PC interface thanks to the GyrFalcon DSA Interface Manager
- True player interface with a VFD-like display (including CD-Text, disc status, etc...)
- Virtual keyboard with key functions
- All relevant commands available (user input or commands panel)
- Full communication with the module can be displayed and saved
- Maintenance mode for technical support of your products
- Spy mode to facilitate the design of your applications

Benefits

- Easy to use interface: possibility to evaluate our modules on a very short term basis
- Improved decision process for manufacturers: tests of various applications with the same user interface
- Time to market period shortened for the introduction of your players
- Cost-efficient evaluation tool to reduce your Research and Development budget
- Compatibility with the GF DSA Evaluation Board and the DSA Interface Manager for all our current audio modules and our up-coming products base on the DSA protocol
- One single tool for the design and technical support of your products

Availability: Q4 2008
